

1. How many tablespoons are in 75 ml of olive oil?
- A. There are 5.87 tablespoons in 75 milliliters of olive oil.
 - B. There are 5.42 tablespoons in 75 milliliters of olive oil.
 - C. There are 5.77 tablespoons in 75 milliliters of olive oil.
 - D. There are 4.62 tablespoons in 75 milliliters of olive oil.
 - E. There are 6.42 tablespoons in 75 milliliters of olive oil.
 - F. There are 5.07 tablespoons in 75 milliliters of olive oil.
 - G. There are 5.32 tablespoons in 75 milliliters of olive oil.
 - H. There are 4.47 tablespoons in 75 milliliters of olive oil.

2. Convert 0.08 pints to teaspoons.
- A. 0.08 pints is 7.86 teaspoons.
 - B. 0.08 pints is 7.48 teaspoons.
 - C. 0.08 pints is 7.74 teaspoons.
 - D. 0.08 pints is 7.63 teaspoons.
 - E. 0.08 pints is 7.91 teaspoons.
 - F. 0.08 pints is 7.51 teaspoons.
 - G. 0.08 pints is 7.96 teaspoons.
 - H. 0.08 pints is 7.68 teaspoons.

3. You have 1.9 kilograms of sugar. You use 1300 grams of the sugar. How many ounces of sugar do you have remaining? (Round to the nearest tenth of an ounce.)

- A. We have 20.5 ounces of sugar left.
- B. We have 21.7 ounces of sugar left.
- C. We have 20.2 ounces of sugar left.
- D. We have 20.9 ounces of sugar left.
- E. We have 21.2 ounces of sugar left.
- F. We have 22.1 ounces of sugar left.
- G. We have 21.9 ounces of sugar left.
- H. We have 22 ounces of sugar left.

4. 4 quarts $\frac{1}{2}$ cups is equal to how many pints? Final answers should be truncated at the ten-thousandths place value.

- A. 4 quarts $\frac{1}{2}$ cups is the same as $9\frac{1}{4}$ pints.
- B. 4 quarts $\frac{1}{2}$ cups is the same as $8\frac{1}{4}$ pints.
- C. 4 quarts $\frac{1}{2}$ cups is the same as $7\frac{3}{4}$ pints.
- D. 4 quarts $\frac{1}{2}$ cups is the same as $8\frac{3}{4}$ pints.
- E. 4 quarts $\frac{1}{2}$ cups is the same as $10\frac{1}{4}$ pints.
- F. 4 quarts $\frac{1}{2}$ cups is the same as $9\frac{3}{4}$ pints.
- G. 4 quarts $\frac{1}{2}$ cups is the same as $5\frac{3}{4}$ pints.
- H. 4 quarts $\frac{1}{2}$ cups is the same as $6\frac{1}{4}$ pints.

5. 11 quarts 1 cups is equal to how many liters? Final answers should be truncated at the ten-thousandths place value.

- A. There are 10.2708 liters in 11 quarts 1 cups.
- B. There are 10.3308 liters in 11 quarts 1 cups.
- C. There are 10.8108 liters in 11 quarts 1 cups.
- D. There are 10.4708 liters in 11 quarts 1 cups.
- E. There are 10.2308 liters in 11 quarts 1 cups.
- F. There are 10.6508 liters in 11 quarts 1 cups.
- G. There are 10.6308 liters in 11 quarts 1 cups.
- H. There are 10.8708 liters in 11 quarts 1 cups.

6. 7 pounds 9 ounces is equal to how many kilograms? Final answers should be truncated at the ten-thousandths place value.

- A. There are 16.1731 kilograms in 7 pounds 9 ounces.
- B. There are 3.7419 kilograms in 7 pounds 9 ounces.
- C. There are 16.7131 kilograms in 7 pounds 9 ounces.
- D. There are 3.4219 kilograms in 7 pounds 9 ounces.
- E. There are 16.9531 kilograms in 7 pounds 9 ounces.
- F. There are 2.8819 kilograms in 7 pounds 9 ounces.
- G. There are 17.0331 kilograms in 7 pounds 9 ounces.
- H. There are 3.6619 kilograms in 7 pounds 9 ounces.

7. A recipe calls for 200 ml of orange juice. How many cups of juice should you use?

- A. We should use 0.9649 cups of orange juice.
- B. We should use 0.8849 cups of orange juice.
- C. We should use 0.7649 cups of orange juice.
- D. We should use 1.065 cups of orange juice.
- E. We should use 1.1649 cups of orange juice.
- F. We should use 0.8249 cups of orange juice.
- G. We should use 0.8449 cups of orange juice.
- H. We should use 1.3849 cups of orange juice.

8. 9 quarts 10 tablespoons is equal to how many liters? Final answers should be truncated at the ten-thousandths place value.

- A. There are 8.5486 liters in 9 quarts 10 tablespoons.
- B. There are 9.1886 liters in 9 quarts 10 tablespoons.
- C. There are 8.2286 liters in 9 quarts 10 tablespoons.
- D. There are 8.5886 liters in 9 quarts 10 tablespoons.
- E. There are 8.6686 liters in 9 quarts 10 tablespoons.
- F. There are 9.0886 liters in 9 quarts 10 tablespoons.
- G. There are 8.5086 liters in 9 quarts 10 tablespoons.
- H. There are 8.5686 liters in 9 quarts 10 tablespoons.
