2	This was by far the best class I have ever taken online. The way Professor Holt talks, and makes jokes, it feels like I am in a real classroom. I didn't feel like an afterthought where the class was too easy, or that they expected too much and that I was drowning. I loved that the lectures were in-depth to help students with less understanding, but I could skip and jump around the video to fit my needs. In high school, I was not too fond of math classes because I was always ready to move on after one explanation, while most of my peers needed individual help and further instruction. This class's model allows me to hear the procedure, pause the video, try the math myself, and then skip ahead to see if I got it right. It allowed me to excel at my speed. Professor Holt is kind, helpful, and truly understands the life of a college student providing helpful hints, assignments, and anecdotes during his lectures. This class helped me fall in love with math again. ("Greetings Students" was a personal fav)	
3	Thanks, Mr. Holt!	
4	Thank you Professor Holt for putting together such an outstanding course! Hands down the best online course I have taken at SOCC thus far due to the manner in which the material is presented, the instructors knowledge, and the sheer amount of resources available that I'm sure took Professor Holt many hours to put together. If one fails this course, it's because they aren't putting in the effort as the course is exceptionally well constructed.	
5	None	
6	N/A	
7	My professor was always able to help, I loved and enjoyed taking this class. Math is not my strong course, but he made it seem fun.	
8	Mr. Holt provided very helpful lecture videos and I feel I was graded very fairly based on effort. That made it easier to learn a subject I've always had some difficulty with.	
9	It is hard to ask questions when you are in an online class. I have question that may not be during office hours. and sometimes replies from instructor is after the time line for assignment.	
10	I wish there was access to an actual power point where you could print off the lecture rather than the notes.	
11	I was extremely impressed with how organized the course material was. Professor Holt did a great job of making sure there were plenty of resources to understand the material and also making himself available for those who need extra help. Stats was a little difficult for me, but I was super impressed with the organization and professionalism of this course.	
12	I really appreciated the addition of the website, the opportunity to access things different ways and practice as much as one would like was very helpful.	

13	I enjoyed being a part of this class and found it very easy to be successful.	
14	I came into this course a little stressed thinking it would be a load. So I already knew I needed to give this class my full attention and truly pay attention. I loved the content and had a great experience. If you pay attention you will be all set. Thank you, Mr. Holt	
15	Hard online will probably take in person again	
16	Great layout of materials and expectations. Easy to follow course and instruction.	
17	Great course! Very tricky. It brings up quick a few conflicting emotions. (Frustration being one of them) but also satisfaction with progress that comes. I think you do great teaching and it's hard to be effective online. I think that is the biggest battle is that this subject is one of the few classes I would say is harder to take online because of the lack of instant feedback you get in the classroom. I did learn a lot! I am not sure if this was your goal but I now no longer trust any stats I see in the real world. Thanks for the learning!
