**Response Rate:** 100.00% (4 of 4)

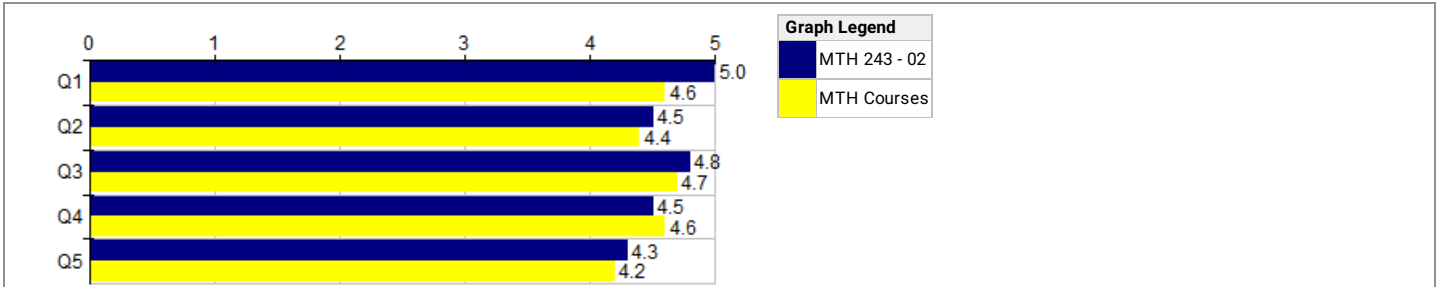

1	This was a fun course, despite it being online and slightly difficult because of so. I actually learned a lot despite my current grade, I just have a hard time managing time in order to get all the homework in.	
2	No comments	
3	I struggled with understanding a lot of the material. Online Math courses are not ideal for a student like me.	
4	Great teacher.

Q6 - Comments regarding your course?	
<b>Response Rate:</b>	100.00% (4 of 4)
1	This course was hard but not as hard as I expected it to be. Mr. Holt is a good teacher and I was able to learn math online and understand it. 
2	Thank you Mr Holt for all your help this term, you made this class/subject fun to learn! 
3	I had originally registered for a face-to-face Stats class because I was worried that an online version may be difficult; however, COVID19 had other plans for me. To my surprise, my fears were put to ease within the first week of online class. Mr. Holt is very organized and explains the material and content so thoroughly, I have been doing well even with the online format. I have recommended Mr. Holt to other students at SWOCC and have been very comfortable with asking for help and with the help I've received. Mr. Holt always answers his emails and is available for ZOOM office hours. I do not feel slighted in having to have had Stats as an online course. I don't think it could have gone any smoother and I have Mr. Holt to thank for that! 
4	Great job adjusting to this being online instead of in person! Enjoyed having you as a teacher!

Q6 - Comments regarding your course?	
<b>Response Rate:</b>	100.00% (3 of 3)
1	I have failed this class a few times before, a big thank you to Professor Holt for helping me understand the material to pass the class. <a href="#">Q</a>
2	I enjoyed the information we learned in this course; however, it was a difficult course to take online. It would be helpful to be sure homework questions are doable. The professor was always willing to help with questions, which was greatly appreciated. <a href="#">Q</a>
3	Great course, very helpful. I would like if things, such as, combining power series through addition, subtraction, and multiplication were gone through more. Because the book basically says you can, but doesn't do the math involving numbers when it comes to multiplying power series. That left me a little confused on how it really worked. It would be much appreciated if small things like that, where the book doesn't go over examples of it very well, if it was gone over more in the lectures. But other than that, this course was great. <a href="#">Q</a>
