Q6 - Comments regarding your course?

Response Rate: **100.00**% (**4** of **4**)

1	great course, i finally am wrapping my head around calculus
2	The instructor tries to help me whenever I need his advice and helps.
3	I would like having more resources to refer to when working on material like homework out of class. Sometimes I wasn't able to make my own notes clear enough to understand later, so having sample problems worked out or more information on lesson slides would be very beneficial. I am a 4.0 student and have been all throughout high school and multiple years of college. I have never felt so unprepared for exams. The material that was taught in class covered about 1/4 of what we were expected to perform on tests. Several of us in this class have tried to work together to complete homework with the subpar notes that were provided to us.
4	The main source of my "learning" came from the tutors in Tioga who are rarely available, and Google. The exams, homework, and notes rarely matched up. I am disappointed that I even took this class because it will likely hurt my gradepoint average, thus hurting scholarships for next year where I plan on taking a math course that is actually helpful instead of a waste of time and money.

Q6 - Comments regarding your course?

Response Rate: **100.00**% (**4** of **4**)

1	This is by far the best instructor and class I have experience with at this school thus far.
2	The subjects in this course were fun to learn.
3	I'm not 100% sure the way the graded material was split was the best way to do it. 30% for test 1 and 2 and homework with 10% attendance. I think this would work better if there were more than 5 questions on the exam. With the time limit, however, it also does not seem feasible to increase the amount of questions. Perhaps a longer test could be taken by the students at the testing center at their convenience over the course of 3 or so days. This allows students to spend more time on a test that could take longer than 50 minutes to complete.
4	Each question on the test was 6% of the final grade.

Q6 - Comments regarding your course?

Response Rate: **100.00**% (**3** of **3**)

1	The program used was hard to navigate and i would prefer a class that was not computer based for math. This is the reason i took this class was to have the in class structure and i ended up with a computer based class instead making my learning rather difficult. i am not satisfied with this class.
2	Not a fan of the ALEX based course. Having an instructor in the room was helpful.
3	Have a hard time with material being on the computer instead of in a book.
